

Sunnyside Communities
Retirement Living Since 1912

Sunnyside Communities has been working with The Telephone Man (now called TTM) for more than 30 years. In the beginning for telephone switch management at the Sunnyside Campus. As Sunnyside has grown to three facilities and a corporate office in Virginia, TTM continues to be a great partner.

We have recently replaced telephone switches in all three communities, installed WI-FI, and updated call bell systems (SARA). Additionally, TTM has been our low voltage wiring contractor during companywide renovations.

TTM is our go-to technology company bringing fresh ideas to the table, and providing remote and on-site service as needed.
